At 7th BUILDING TRADE FAIR at "Šumadija sajam" Kragujevac, on March-01st-2013 at Serbian chamber of engineers' info-booth, the study program of urban engineering developed at Faculty of Engineering, University of Kragujevac was presented. Fair visitors were very interested to obtain information related to the new study program (especially potential students). Beside, the meeting was used to make initial discussion with present representatives from Serbian chamber of engineers and municipal public service companies related to the development of LLL urban engineering courses
