On September 18th, 2013, Serbian delegations saw the ways of VGTU cooperate with municipality and companies on different programs and activities related to urban and sustainable development. First, the group visited Vilnius Municipality where M. Monkevicius had the presentation Vilnius: Challenges and Actions. Then, the group visited Traffic Control Centre of Vilnius Municipality. The afternoon program was designated to the visit to urban engineering companies (Urbanistika LTD and TAEM Urbanistai Ltd) in Vilnius.

Project quality control meeting was held at VGTU premises on September 19th. After presentation on realized project activities by project coordinator, the meeting and discussions related to the quality of the achieved project outcomes were organized. It was concluded that the level of achievement of the project objectives is according to project proposal and the prospects of achieving project objectives by the end of the project financing are realistic.
