

Dr ing. Cristiano Fragassa and dr ing. Ana Pavlovic from UNIBO had presentations to non University DIAUSS partners at the premises of Polytechnic School Kragujevac (HS1) on October 14 and 15 2013. The participants were mainly high school teachers but there were also other engineers interested in automotive engineering.

The presentations were:

1. Methodology for reliability and safety calculation of the automotive vehicles with the concrete examples from FIAT, Magneti Marelli and other companies – Dr Fragassa,
2. Introduction to numerical simulations and the use of commercial software – ANSYS – Dr Pavlovic.
