

The final PCB meeting of TEMPUS DIAUSS project was held at premises of Faculty of Engineering University of Kragujevac . The meeting was organized and realized as a part of traditional International Congress Motor Vehicles & Motors 2014 on October 9th- 10th, 2014. The project started on October 2011 with the objective to develop and implement interdisciplinary bachelor and master curricula both in automotive engineering and urban engineering at 4 Serbian state universities (studies adjusted to the Bologna process requirements and aimed at achieving international transparency and academic and professional recognition).

The meeting was organized with the aim of gathering all project consortium partners from Serbia and EU and presenting the project results, conclusions, lessons learned from the project, new ideas developed during the project life time and plans for the future. More than 30 representatives of academic and non-academic partners participated at the meeting.

It was a chance also to disseminate and promote activities and results of DIAUSS project not only on project level but also with professionals and researches from outside consortium (predominantly from Western Balkan Countries).

The overall conclusion was that the project goals were achieved.
