

The student internship for study programs enables students to achieve work experience relevant to their future professions and to familiarise themselves with the work environment and workplace demands. The participating Serbian University i.e. their faculties that developed study programs of urban and automotive engineering, signed appropriate agreements with relevant companies and institutions related to student internship. Topics and detailed work programme are prepared in cooperation with automotive industry and municipal public service companies. General information about open places for student internship followed by possible topics will be available to students so they could prepare appropriate application.
