

This activity is performed by all national university consortium members through:

- review of starting and planning of new sustainability action,
- taking care of sustainability factors at the project level (continuously reviewing the fulfilling of the needs of the automotive industry and public service companies, involvement of consortium members, securing on time, adequate resources for continuation (human, financial,))
- taking care of sustainability factors at the context level (academic / university support, support from national authorities, support from socio-economic factors, such as enterprise association, local public administrations, etc.)

Academic sustainability is ensured by University support to developed or modernized study programs since they are going to be accredited at a national level by the independent National Accreditation Office.
